

Jumbotag[®] "Tough and clear identification".

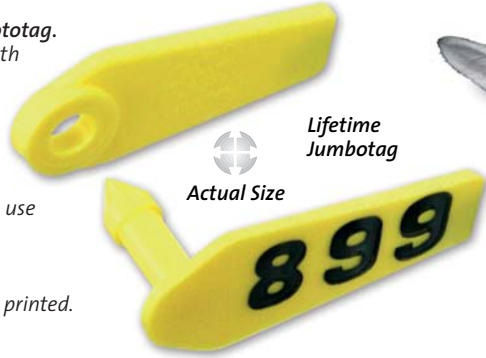

Lifetime Jumbotags

The *Jumbotag* is a larger Version of the *Rototag*. Many have tried to copy the *Jumbotag* with low quality materials but don't be fooled, there is no substitute.

Movement Jumbotags

The same shape and size but made from a lower quality Nylon for short-term use (up to 12 months).

Supplied laser printed with your choice of details on either side. Inside can also be printed.

Suretag® “Flexible, Low cost - and easy to read”.

No.1 Visual Sheep Tag Design in Europe

Made from high quality TPU and available in two sizes the **Suretag** is the most flexible way to identify your breeding flock when visibility is required. Interchangeable sizes, the male tag is normally applied to the back of the ear (except for long-eared goats) and the point is protected with a closed cap on the female part.

Available plain for self marking with the **Dalton marker pen** or dark laser printed as required. When printing official codes on both sides it is also possible to print one side smaller to allow space for self-marking. Specify Management print if required.

Suretags fit most needle type applicators by simply replacing the needle with our conversion kit.

U-Tag[®] “The Lifetime Loop Tag”.

98% Retention - For Serious Breeding Schemes

Combining TPU with a rigid nylon pin, the U-Tag is an advanced method of long term identification in a one piece tag. U.V. Stabilised, Microbial resistant and dark laser printed. When retention is the key issue the U-Tag is the first choice for the professional farmer.

Lifetime U-Tag

Actual Size

Made to the same high exacting standards and using the same materials as Tamperproof cattle Supertags, the U-Tag is mechanically engineered to the very highest degree.

Supersmall™ “Tiny & Light”.

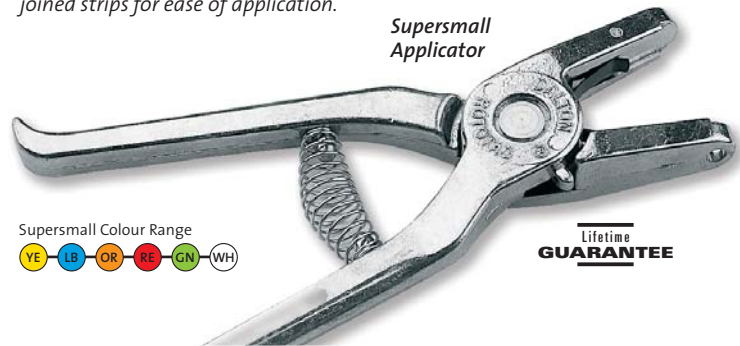

Tagging in the first few hours

Based on the *Supertag* design, this tag is a miniature version with such a small pin that injury to the lamb’s ear is minimal.

Able to last up to 6 months in some circumstances, the *Supersmall Supertag* has proven to be the ideal management tool for pedigree sheep breeders.

All *Supersmall Tags* are Laser printed and supplied in joined strips for ease of application.

Tagomatic® “Low cost and Fast to Fit”.

The Quicker short Term Tag

The *Tagomatic* is a simple one-piece tag. Fast to fit and easy to apply, this low-cost tag is the preferred option for farmers seeking rapid identification on a budget for movement or slaughter.

The *Tagomatic* is designed as a movement tag for application to sheep moving off farm or to slaughter. Produced from a special flexible nylon material, all tags are laser marked to order and supplied in joined strips for ease of application. Blank tags cannot be self-marked.

Suitable for all Livestock - Two Sizes

I-Tag[®] "Automated Electronic ID with Guaranteed Readability".

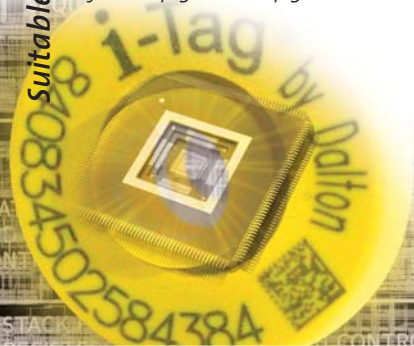

Encoded with the same number as printed on the outside*

Made from the high quality durable TPU the I-Tag is an ISO Standard 1178/11785 FDX-B 134.2Khz Electronic eartag. ICAR Approved and tested to PAS 44/2002 BSI. Each I-Tag has high retention and long read range.

* within ICAR Standard

Read Range up to 2m - Anti Collision

Available in both Tamperproof and Re-usable versions. Large 30mm Dia in Supertag version for cattle and 28 mm Dia in Suretag version for sheep, goats and pigs.

Lifetime I-Tag

Actual Size

What's inside?

Philips[®] Hi-Tag S Chip on Board. Welded to coil (Large Version pictured)

Thicker, high quality wound & heat formed Coated coil

Where Legislation requires that all livestock are individually numbered identification becomes harder to read, record and trace without the need for a large labour force.

Modern electronic identification provides the answer. An electronic transponder comprising of a chip and coil specifically tuned to 134.2Khz in ISO standard can be encoded with the animal and farm number as printed in visual form on the outside of the eartag. As an animal walks through a portal or gateway reader the number is read and recorded electronically. No need for additional labour and no costly errors saving time and money.
